

AMENDMENTS TO THE CLAIMS

Please rewrite the claims as follows:

1. (Currently Amended) An electrophoretic display, comprising:
a substrate,
a first ~~electrode and~~ electrode, a second electrode, an insulation
layer disposed between said first electrode and said second electrode are
supported by ~~disposed on~~ said substrate, and ~~microcapsules each, disposed~~
~~on said substrate~~ microcapsules, each containing a dispersion liquid
comprising a dispersion medium and two species of electrophoretic
particles different in charge polarity and color, are disposed on said second
electrode,

wherein said first and second electrodes are disposed so as to
create an electric field along a surface of said substrate and are to be
supplied with a voltage so as to move said two species of electrophoretic
particles in mutually opposite directions along said electric field to effect
display.

2. (Currently Amended) A display according to Claim 1, wherein
both of said first and second electrodes are ~~disposed on~~ supported by the
surface of said substrate.

3. (Original) A display according to Claim 1, wherein said first electrode is disposed on the surface of said substrate and said second electrode is disposed between adjacent microcapsules.

4. (Original) A display according to Claim 2, wherein the colors of said two species of electrophoretic particles are white and black and said display effects white and black display.

5. (Original) A display according to Claim 1, wherein a color filter is disposed on said microcapsules to effect color display.
